

WORLD CLIMATE SCHOOL

INTRODUCING “WORLD CLIMATE SCHOOL” – AN AWARENESS RAISING PROGRAM.

Abstract:

World Climate School is an educational program offered by the the team behind <https://climate-change.site>

The aim is not only to educate minds, but to create motivation for Climate Action, going beyond all kinds of denial: Intellectual, emotional and political. Duration approx.. 20-24 hours, - either compact (Weekend) or spaced (8 weeks, 3 hours a week). Themes include the challenges, solutions and the dilemmas involved. In addition introducing relevant websites, scientific resources, teaching material available, videos, powerpoints, etc.

After that we offer a threefold approach:

1. **Workshops** supporting participants in developing concrete action based on their own motivation and local knowledge. The goal of this being awareness raising among all members of the community
2. **Teaching the Teachers.** The goal is to create teachers who are able and willing to take on the task on educating others based on The Climate School and the teachers' own knowledge and motivation. The logic is quite simple: 1 person educating 20, in turn educating 400, in turn educating 6000 etc. etc. We offer support to groups of educators, - as well pedagogy / methodology as knowledge about our present challenges and the solutions.
3. As an essential part of this we can also offer **psychological assistance in handling loss, grief and sorrow**, and how to transform inaction and helplessness to action,

Our two websites: <https://climate-change.site> and <https://theclimatecinema.org> are included, serving as very content rich and pedagogically
